

In February 2019, AAH was awarded works at Werribee train station to remove mould and lead paint from the internals of the station.

SCOPE OF WORKS

- Remove mould and lead paint from affected surfaces in the cleaners room, plant room and staff room.
- Works to be completed during normal work hours

CRITICAL FACTORS / CHALLENGES

The challenges and critical factors to successfully complete the works were:

- Werribee station is a busy location with the general public moving around the works areas
- All personnel had to be RIW accredited
- Waste had to be removed via a publicly shared pathway
- Works had to be completed with minimal disruption to usual station operations

OUTCOMES

- Works were successfully completed with minimal disruption to station operations
- Temporary fencing was set up on the station concourse around the works area to ensure the public were kept safe
- Areas were fully cleaned/decontaminated which allowed underlying water leaks issues to also be fixed
- Completed on time and within budget with no incidents
